

André Neu

Cerner Deutschland GmbH

His first exposure to healthcare was his work as an EMT/paramedic for the German Red Cross alongside his university studies at the Technical University of Darmstadt. Graduating from Darmstadt with a masters level degree in the combination of computer sciences and business administration, he began his career at the Novell spin-off Pervasive Software, a U.S. software company that has specialized on cutting-edge database and integration technology.

After close to ten years he moved on to Lorenz Life Sciences, a German software company providing technology solutions for the regulatory divisions of pharmaceutical companies and regulators to improve the cost and quality of submissions of marketing authorizations and product labeling. There, he had the opportunity to work with many of the largest global pharmaceutical companies and regulators around the world.

Since 2008 he has been with the German subsidiary of Cerner Corporation and began as the European Service Manager. Since 2010 he has been leading the Imaging Business Unit and worked closely with many clients from large academic facilities, chains and even practices throughout Europe.
